### The merchant of merchants

We initiate coverage of CDON with a midpoint DCF equity value of SEK 850. CDON is the leading marketplace in the Nordic region, with 2.3m customers (8% of the population) and over 1,500 connected merchants. CDON offers an exposure to structural growth as consumption shifts online and high margin potential reflecting the oligopolistic nature of marketplaces. Growth is asset light (commission model, no WC need), which also drives a high ROCE.

#### The leading Nordic marketplace – an oligopoly-like margin opportunity

Our analysis shows that the top-three marketplace operators typically take a combined 45-50% share of total online spend in a market. The inherent strength in a marketplace business builds from a mutual benefit of "all" buyers being able to find "all" sellers and vice versa. Here, CDON has carved out a position as the leading consumer brand and marketplace across the Nordic four country markets. We believe Amazon.se will accelerate the consumer shift to online and drive the marketplace channel share of total retail spend. The commission-based revenue model requires no working capital and gross margins are close to 95%. We reckon this drives EBIT margin expansion and resulting high ROCE.

#### We expect 3P GMV CAGR of 26%, EBIT CAGR of 79% in 2021 to 2023

We forecast CDON Marketplace to grow its third-party (3P) GMV from SEK 2.5bn in this year to almost SEK 4bn in 2023, implying a CAGR of 26%. Assuming take rates of 10-11%, gross margins of 93-94% and some operating cost leverage, we expect EBIT to increase to SEK 110m in 2023, equal to a 79% three-year CAGR. Based on its negative WC position, our OCF forecasts are also higher.

#### We set our midpoint DCF equity value at SEK 850 (1.40x 2022 EV/GMV)

We believe investors will value CDON based on EV-to-GMV. Our marketplace peer group is now being valued at 1.40x 2022 EV/GMV median estimates, which compares to our forecasts in CDON implying 0.80x next year's EV/GMV (a 43% discount). At our midpoint DCF value CDON would trade on par with peers.

Source: SEB			

We initiate coverage of CDON, the leading online marketplace in the Nordic region, with a midpoint DCF based equity value of SEK 850 per share. This implies return prospects of 65% from current share price levels. Based on our forecasts, we believe CDON is today valued at 0.80x next year's EV/Gross merchandise value (GMV), which corresponds to over a 40% discount to its international marketplace peer group median valuation of 1.40x EV/GMV. At our midpoint equity value of SEK 850 per share, this would imply a valuation in line with main the sector median, as well as main peer Polish Allegro.eu.

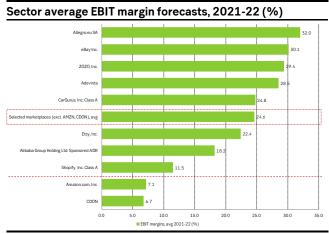

Source: SEB, Factset

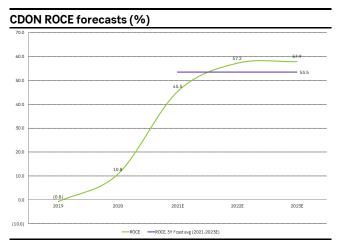

We believe the online marketplace sector offers investors an exposure to structural growth and well-protected margins. For CDON, holding a prominent market and brand position amongst Nordic consumers, we argue the following key market characteristics add to our company investment case:

• Structural growth: while consumer sales reflect real disposable income growth and discretionary budget decisions, the accelerating shift in consumer behaviour (increased online presence and spend) will bolster growth in the Nordic e-commerce market for years ahead. Here, CDON has built a market leading position in the Nordic region. Our estimates imply a CAGR of 25.7% in marketplace (3P) GMV over our forecast period to 2023

- Oligopoly-like markets: Just like in search advertising (Google), local and yellow pages (Solocal) and classified advertising (Adevinta), the inherent strength in a marketplace business builds from a mutual benefit of "all" buyers being able to find "all" sellers and vice versa. The top-three marketplace operators today take closer to 45% share, or more, of the local e-commerce market. Over time, we argue, this market structure lends support to a lower equity risk premium in the sector and in CDON
- **High margins:** Along with increasingly high barriers to entry, this market structure also means an opportunity for high margins. Based on our current business mix assumptions, we reckon EBIT will expand from 4.5% of sales in this year, to 13% in 2023. Serving as a long-term indication of margin opportunities, margin consensus estimates for a peer group of marketplaces is currently averaging 25% in 2021-22
- Asset light: the third-party (3P) marketplace model is largely based on drop shipments, which allows CDON to operate with minimal working capital (inventories), resulting in a high return on capital employed. In 2021-23, we estimate CDON to generate an average ROCE of 53.5% (57% in 2023). We note that these ROCE forecasts are burdened by its debt-free balance sheet, as well as sub-industry EBIT margins, reflecting its business mix (in transition) and expected growth investments

Source: SEB

### Marketplace forecasts in summary

In recent years, CDON has consistently converted its own online retail operations to a marketplace, offering Nordic consumers a large assortment of goods in a wide range of product categories – and at competitive prices. In last year CDON Marketplace had over 1,500 associated merchants on the platform, including CDON's own retail store (complementary offering of mostly legacy media products, which will continue to decline ahead).

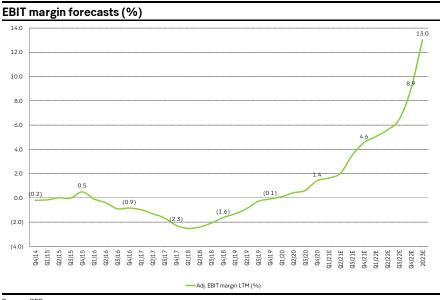

In the Nordic region, CDON Marketplace now counts an impressive 2.3m active customers across its four dedicated country sites, equal to 8% of the population. Last year these customers generated a total GMV of SEK 2.4bn, including SEK 1.8bn in 3P GMV. CDON earns a take rate commission on 3P GMV that we estimate to be in the range of 10-11% (2020E: 10.7%).

Since CDON Retail will gradually be phased out, we believe investors will use CDON's 3P GMV as the most important KPI for estimating sales (commissions) and earnings growth prospects. Here, our forecasts build from a three-year CAGR of 26% to almost SEK 4bn in 2023 (growing to SEK 5.5bn in 2025). Since there are no particular costs associated with take rate income (gross margins are in the range of 93-94%), we also expect CDON to generate strong EBIT margin expansion from levels of about 4.5% in this year to 13% in 2023 (and 17% in 2025).

As outlined above, its more mature marketplace peers generate average margins of about 25%, which we argue would be a long-term potential for CDON too. In all, we forecast CDON to record EBIT of SEK 110m in 2023, equal to a CAGR of 79% from this year's EBIT estimate of SEK 34m.

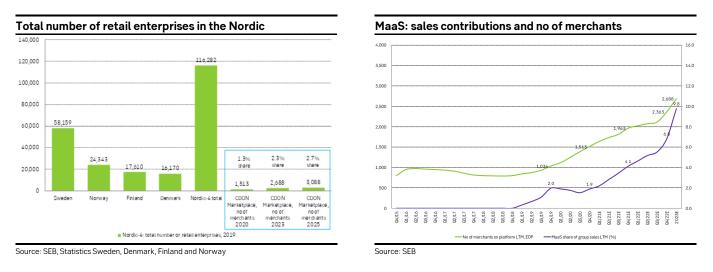

Source: SEB

### Connect – Marketplace-as-a-Service

While still in its infancy, CDON is developing its CDON Connect e-commerce platform that will gradually enable the company to generate new income streams from subscription-based and other merchant services. Much like a software-as-a-service (SaaS) provider, where customers pay a subscription fee for using the software stored in the cloud, generating monthly or annual recurring revenue (MRR, ARR) for the provider, CDON Connect is a marketplace-as-a-service (MaaS). In summary, we identify four auxiliary income streams for CDON Connect over our forecast period:

- Monthly merchant subscription fees (launched in Q4/20).
- Take rate commission on external marketplace GMV.
- Merchant services (fulfilment services, for example) and supplier kickbacks (payments, for example).
- Advertising income (sponsored products).

Estimating the total addressable market (TAM), there are over 115,000 registered retail companies in the Nordic countries (of which almost 60,000 are registered in Sweden). While most of these enterprises are very small (employing no more than five people), market research, covering small and medium-sized retailing companies, shows that the global average revenue per merchant (ARPM) is USD 1,653 per annum. Using these metrics as a very rough calculation for the Nordic market, we arrive at an estimated base case market value of SEK 0.8-1.6bn, where the range is based on the number of addressable companies.

### Key risks and investment concerns

• Amazon: we base our earnings forecasts on (rather) high growth in CDON Marketplace GMV. We see Amazon.se as a new price leader in the Nordic market and which may eventually feed through to pressure on merchant margins. Elsewhere, Amazon has consistently been sacrificing margins over growth for the past tow decades. For this reason our estimates are based on a declining take rate for CDON over the forecast years. Our take rate assumptions, which largely builds our gross profit estimates, could prove too high. This said, in our opinion we conclude that Amazon.se will likely be an important driver for the online marketplace channel share ahead and so bolster growth on CDON's marketplace as well

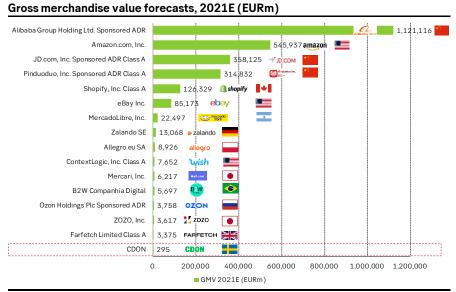

- While its first version of CDON Connect, the e-commerce platform, has been launched and generates some income, the company will clearly continue to invest capex and opex in the platform from this year onwards. Our forecast assumptions build from all four new income streams generating income as of 2022. We are concerned that there may be delays in this product development. Also, for example, while we assume a considerably lower (2.5%) take rate on GMV generated by merchants connected to external marketplaces via CDON Connect, these levels could prove too high and the revenue share model may be constructed in another way that makes our CDON Connect estimates too high
- In 2015, the Finnish Tax Authority claimed that CDON Alandia, a subsidiary of CDON, should pay a total of EUR 6.9m in additional taxes and fees covering undeclared VAT sales in Finland for the year 2012. CDON settled the tax payment in full in January 2017 and has disputed the claim until a final appeal to the Finnish Administrative Court was dismissed in October 2019. Five previous board members in CDON Alandia were charged with tax fraud. The Finnish Tax Authority has also raised claims against four of these individuals. In the event that these claims become valid, CDON has agreed to assume responsibility for the vast majority of any such costs and which levels are unknown
- CDON's financial disclosure and track record as a listed company is limited. For competitive reasons, the company does not disclose important KPIs, like actual 3P take rates for example. Given the volatile development in 3P GMV recently (exceptionally strong in the past year, while slowing in Q4 due to the launch of its new platform) this suggests a higher equity risk premium is appropriate for CDON in the near term. Any future improvements to reporting disclosure, we argue, could also better earnings visibility, forecast certainty and lower the valuation risk premium for equity investors

# Marketplace business model

### The virtuous circle is spinning

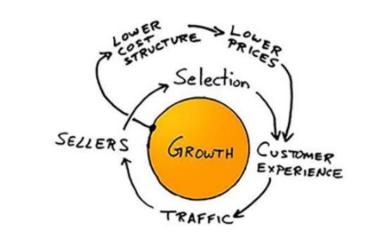

Source: SEB, Factset

Reflecting Amazon's strong growth track record in its core US marketplace business, adding geographical expansions (now operating from 16 dedicated country sites, including amazon.se since October last year), new products (such as Prime, the subscription service) and segment expansions (such as cloud service AWS and the acquisition of US Whole Foods), Amazon last year generated an estimated GMV in excess of USD 500bn. According to Factset consensus, estimates imply a growth in Amazon's GMV of 26% in this year to around USD 635bn (or EUR 518bn – see chart).

China's Alibaba (operating T-Mall, Taobao and more) is the world's largest marketplace in terms of generated GMV. Based on our EUR 322m GMV forecast in 2021, CDON is the largest local marketplace operator in the Nordic markets.

#### Executive Chairman and founder Mr Jeff Bezos' virtuous circle

Source: Amazon

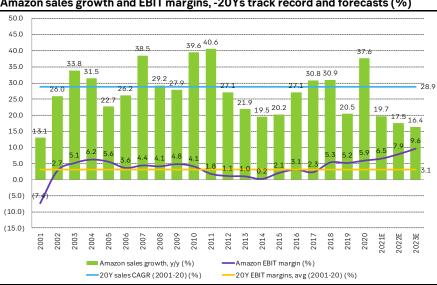

Amazon's mission "to be Earth's most customer-centric company" is based on the napkin sketch by founder Jeff Bezos, outlining a virtuous circle. Starting from the customer experience, building site traffic and attracting more merchants to the platform, this further improves the selection available. The higher volumes generated on the marketplace makes it possible to scale costs and to lower prices, which again improves the customer experience and so on.

CDON flywheel: putting numbers to the virtuous circle									
CDON	2020								
Traffic/Customers	Site visits +28%, Active customers +27%								
Merchants	+477 to 1,513								
Product range	+8m products								
Lower cost structure	Automation and scale								
Lower prices	Competition between increased no of merchants								
Customer experience	Improved selection, lower prices								

Source: SEB, CDON

This flywheel is building the strategic plan for Amazon and for CDON alike. For brand owners (growing its direct-to-consumer sales on marketplace platforms - compare Nike, Puma, Adidas/Reebook and more) and retailers, this highlights several opportunities (long-tail, geographical expansion, volumes), as well as threats (brand control, pricing/margins).

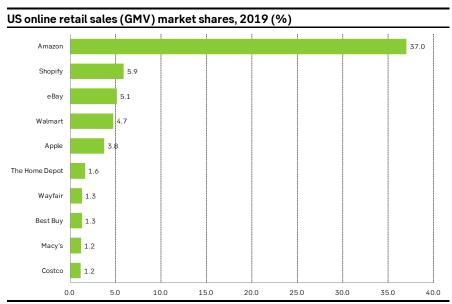

Based on product and brand positioning and economics, including decisions on fulfilment (for example, Amazon offers both Fulfilment by Amazon, FBA and Fulfilment by Merchant, FBM at various associated fees), we believe the strategic decisions on how to use marketplaces will increasingly impact growth and margin developments for the consumer goods companies operating in the Nordic markets. As established earlier in this report, research suggests that in more mature markets, the top-three marketplace operators take a combined 45% share of the market.

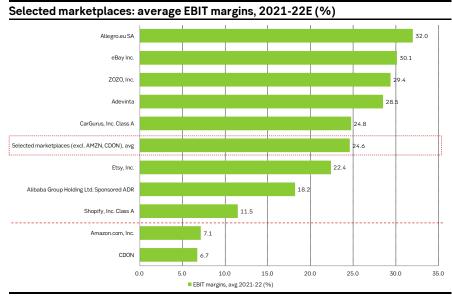

Source: SEB, Factset

Looking at Amazon's financial track record over the past two decades to 2020, the group has generated an impressive sales compound average growth rate (CAGR) of 28.9% and an EBIT CAGR of 34.8% in the 19 years from 2002, its first profitable year, to 2020. This means that Amazon is estimated to take a market share of about 37% of all online retail sales in the US.

Source: Shopify, eMarketer (May 2020)

Amazon's operating margins have been rather thin so far: averaging 3.1% over the past 20 years. This is well below other industry players and comparable peers. To us, this suggests that the group has rather prioritized growth over earnings and that its key focus has remained on improving the customer experience, i.e. lowering prices for consumers rather than lifting its margins.

Source: SEB, Factset

Looking elsewhere in the sector and perhaps at more mature marketplaces, such as eBay, or marketplaces based on classified advertising, such as Adevinta, or other peers like Alibaba and Allegro.eu, operating margins average closer to 25% based on consensus forecasts for 2021-22.

We argue these margin levels reflect the highly profitable commission business model of marketplaces, enhanced by the oligopoly-like market structure and could serve as an estimate for the long-term margin potential in CDON as well.

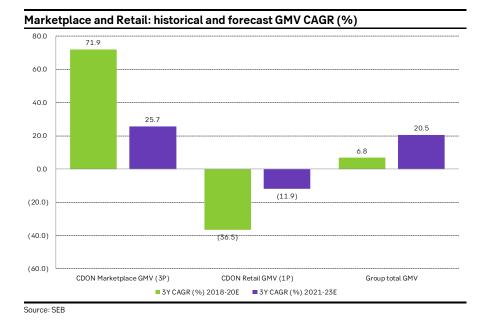

### **Comparing Marketplace and Retail P&Ls**

P&Ls by area 2020 (SEKm)	Marketplace (3P)	Retail (1P)	Group
Gross merchandise value	1,777	598	2,375
Net sales	205	590	795
External GMV take rate (%)	10.7	-	
Cost of goods	-	Yes	
Fulfilment	-	Yes	
Postage	-	Yes	
Freight	-	Yes	
Other (incl. credit card fees, bank costs)	Yes	Yes	
Total cost of goods sold	(12)	(535)	(547)
Gross profit	193	55	248
Gross margin (%)	94.1	9.4	31.2
GP-to-GMV (%)	10.9	9.3	10.5
Adj. EBITDA			34
Adj. EBITDA margin (%)			4.3

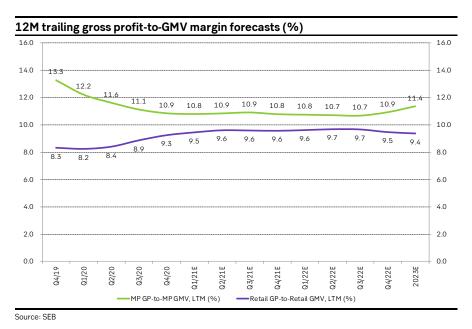

Source: SEB, CDON

In a marketplace business with a high share of third-party (3P) GMV, contribution margins are high, since the associated costs are limited, and the nominator (sales) are comprised of take rate on the transaction sales value. For CDON, the need for working capital investments (mainly inventories) is decreasing too, reflecting the group's strategic decision to phase out CDON Retail over the coming years. Going into 2021 CDON Retails remaining product category is media products, such as for example CDs and which will continue to decline in demand going forward. CDON aims to maintain its CDON Retail media business for as long as contribution profits are positive.

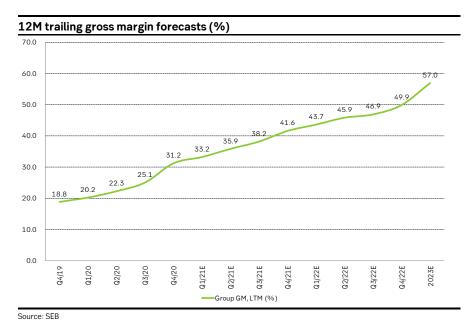

Since 3P "sales" generated in a marketplace are equivalent to the take rate (or referral fee at Amazon), this income does not require the corresponding costs of sales as in a retail model. As outlined in the table above, a retail business needs to assume all the costs associated with any sales: including the cost of goods, cost of fulfilment, cost of shipping, etc.

In order to compare the two different business models and to benchmark the financial performance, we propose analysing profits in relation to GMV, rather than in relation to net sales. This way, we conclude that our CDON Marketplace margin forecasts, expressed as gross profit-to-GMV in the chart below, are more similar to margin levels in CDON Retail (where net sales by definition equals GMV).

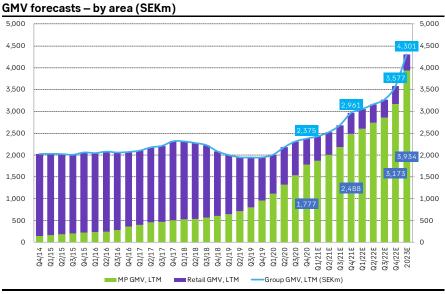

On a consolidated basis, margin expansion reflects our growth forecasts for 3P GMV, as well as the concurrent decline in net retail sales. We expect CDON's reported gross margins (i.e. to sales) to increase from 31.2% in last year to 41.6% in this year and to 57.0% at the end of our forecast period in 2023.

# **Financial forecasts**

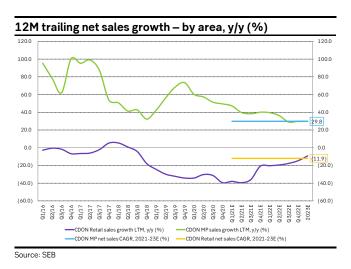

### Asset-light growth and margin expansion

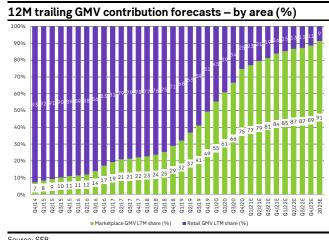

Source: SEB

CDON has two business areas: CDON Marketplace and CDON Retail. CDON Retail acts as one of over 1,500 merchants on the marketplace platform, focusing on retailing media products, such as CDs and DVDs, etc. Reflecting the structural decline in demand for such products, we expect CDON Retail to record a negative CAGR in net sales (which equal GMV in a retail business) of 12% over our forecast period ending 2023.

For CDON Marketplace, where sales mainly reflect the take rate commission income on third-party (3P) GMV generated on the platform, we forecast a GMV CAGR of 26% and a CAGR of 30% in net sales. Increasingly over our forecast period, we expect net sales in CDON Marketplace to include income from new merchant services, i.e. other than the 3P take rate commissions.

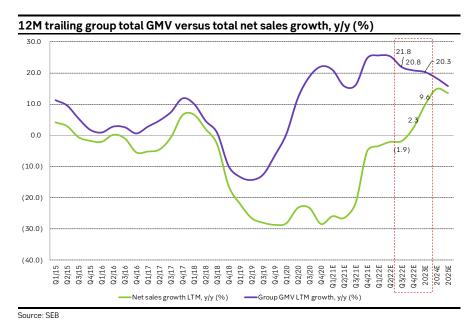

#### Group net sales will continue to decline until Q4 next year

Based on these growth forecasts and the resulting mix between 1P and 3P GMV, this means that the group's trailing total net sales will continue to decline until Q4 next year. We estimate this period to be the inflection point where the contribution from trailing 3P commission sales growth, to group total growth, will be higher than the negative contribution from the decline in 1P retail sales. Eventually, if and when CDON retail sales go to zero, group total GMV growth would also equal net sales growth, less the sales contributions from other merchant services, such as subscriptions, kickbacks and advertising, for example.

### All eyes on GMV

Reflecting CDON's marketplace business model and also its strategic decision to maintain CDON Retail's declining media sales as complementary category on its marketplace (for as long as the NPV of cash flow contributions is positive), we argue growth in GMV is a more important financial KPI than sales growth.

Specifically, we propose looking at 3P GMV growth since this represents the take rate commission opportunity for a marketplace operator. Here, we expect the very high growth rates in last year to moderate in 2021, while still at high levels of about 40%. We reckon the launch of its new platform in Q4 last year and the resulting impact on the consumer experience to continue to weigh on GMV growth in the beginning of this year. Over our forecast period to 2023, we estimate a CAGR in 3P GMV of 26% to close to SEK 4bn.

12M trailing 3P GMV take rate forecasts (%)

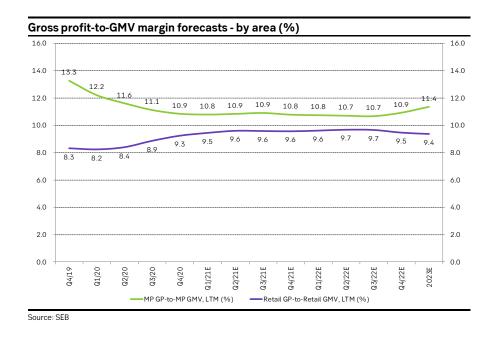

Corporate Research

While we argue that Amazon's launch in the Nordic marketplace sector will help drive the total online channel share of spending ahead, i.e. bolstering growth prospects for CDON, our analysis also points to Amazon being a price leader in the market. This could have a negative impact on merchants' margins and some of this price pressure could eventually have to be absorbed by CDON, affecting its take rate ahead. In last year we estimate CDON's take rate on 3P GMV at 10.7%. We expect a slightly lower take rate in 2021-2023 of closer to 10%.

With these assumptions we also expect significant growth in gross profits reflecting 3P gross margins being at levels of about 93% (again, commission income does not require the associated cost of goods, etc as in the retail model). In all, we expect the changing business mix to drive group total gross margins from 31.2% of sales in 2020 to 53% in 2023. Since this also reflects the lower reported net sales, we propose looking at gross profit-to-GMV margins when analysing contribution margins in a marketplace. This way our marketplace forecasts are also more comparable to our retail margin estimates, we argue.

Its e-commerce platform CDON Connect will increasingly enable CDON to add new merchant services to its offering - often as subscriptions similar to a software-as-a-service (SaaS), while we use the term marketplace-as-a-service (MaaS). In addition to 3P take rate commission income, the company started with merchant subscription fees in Q4 last year. Also, the company has a kickback agreement with its payment solutions provider (Qliro), which adds another income stream to the group.

In the future, we expect CDON Connect to enable its merchants to connect also to external marketplaces in an easy and cost-efficient way. This would entitle CDON to a take rate also on the GMV that its merchants generate on external platforms. We estimate these take-rates will be closer to 2.5%, i.e. considerably lower than CDON's current take rate on its own marketplace GMV. Finally, CDON Connect will allow CDON to offer new advertising products, based on performance fees or sponsored advertising where merchants can bid for listings and rankings on CDON marketplace.

While still in its infancy, we believe that CDON Connect could increasingly become another high margin revenue generator for CDON. We estimate that revenue contributions from CDON Connect will approach 10% of group total sales in 2023.

### EBIT margin expansion to 13% in 2023

CDON reports two cost lines: selling costs and general and administrative costs. Selling costs include, for example, marketing costs, which should be variable and linked to GMV and sales growth. General and administrative costs should be rather fixed going forward and which would add to operating leverage, we estimate. Reflecting the decline in net sales, again from decreasing sales in CDON Retail, this should also drive cost-to-sales ratios up over our forecast period 2021-2023. Still, our SG&A cost assumptions imply a three-year CAGR of 15.3% in the same years, which could be compared to our GMV CAGR of 20.5%.

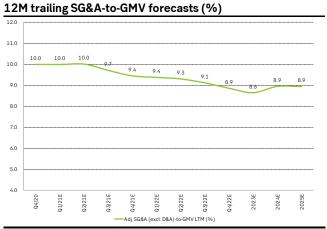

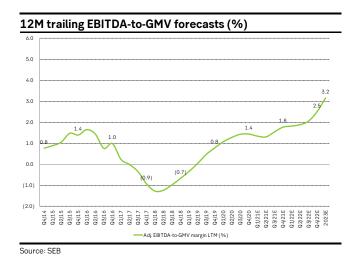

This means that we expect a significant increase in operating profits. From a level of 1.4% of sales in last year, we forecast EBIT margins to reach 13% in 2023. Adding to a positive operating leverage from SG&A costs, our 3P GMV assumptions also drive EBIT margins in CDON. Similar to our earlier analysis of gross profits and gross margins, we propose looking at SG&A, EBITDA and EBIT-to-GMV (rather than as a relation to net sales) in order to compare marketplace performance with retail performance.

12M trailing EBIT-to-GMV margins forecasts (%)

### **Balance sheet and cash flow forecasts**

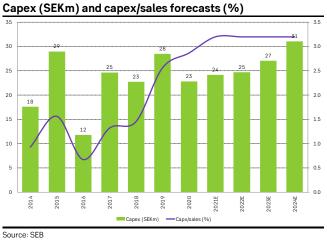

Since generating commission income in CDON Marketplace does not require working capital investments, CDON's transition from retail to a marketplace has also had a significant impact on inventories. Here, stock-in-trade to sales have continued to come down, from peak levels of SEK 255m (14.1% of trailing retail sales) in Q4 2017, to SEK 25m at the end of Q4 last year (4.3% of trailing retail sales). Similar to in many online business models, where retailers and marketplace operators collect payments in advance of paying suppliers, this results in a negative working capital position.

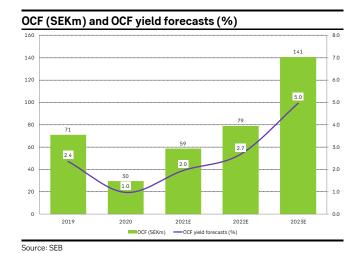

Based on our capital employed forecasts and our adjusted EBIT estimates, which we expect to increase from SEK 11m in last year, to SEK 110m in 2023, we calculate CDON to generate an average return on capital employed (ROCE) of 53.5% in 2021-2023 (57.9% in 2023).

#### Limited capex bolster growth in OCF forecasts in 2021-2023

We estimate capital expenditure of between SEK 25-27m per year in 2021-23. This would correspond to about 3.2% of group net sales, highlighting a limited need for investments. That said, we expect some of the necessary investments in, for example, the development of CDON Connect to be charged to its P&L as opex. In all, this implies that we expect a similar strong cash flow generation in CDON over our forecast period. Here, we expect CDON to increase operating cash flow from SEK 30m in last year, to SEK 140m in 2023. This would correspond to a prospective OCF yield of 5% in 2023.

Source: SEB

The attraction of the marketplace business model builds from a combination of growth prospects, reflecting the ongoing digitization of retail shopping channels and high margin commission income, rather than retail sales (that require investments in cost of goods and various other selling costs). Also, growth prospects are not dependent on the corresponding investments in working capital, as merchants ship goods sold from their own inventories. This results in an asset-light balance sheet and drives a high return on equity and capital employed – key metrics in our fundamental equity valuation.

We arrive at a midpoint DCF-based equity value of SEK 850 per share for CDON. This is based on 6.5% cost of equity and weighted average cost of capital (WACC) since the company holds net cash on its balance sheet. We are using a 10-year model, after which we assume a steady-state EBIT margin of about 24%. While this is much above current margins, this is rather in line with the average margin levels in its marketplace peer group. We base our valuation on a 2% long-term inflation rate and negative working capital forecasts of about 25% of sales (broadly the same levels as today).

### Peer group valuation

#### CDON compares rather well to Polish marketplace operator Allegro.eu

There are large differences in the strategies for the marketplace operators listed below, including geographic ambition and exposure (growth prospects), product revenue mix (Wish aims at growing its 1P sales; CDON aims at phasing out its 1P sales) and in capital employed (for example, in-house fulfilment services). Amongst the listed marketplace companies, we believe the Polish marketplace Allegro.eu to be more comparable to CDON.

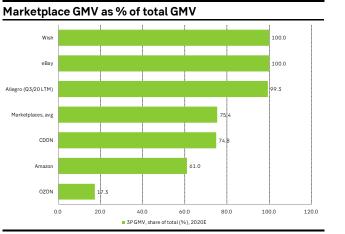

#### Marketplaces active in Europe and platform KPIs

EURUSD 1.21, EURPL 4.54, EURSEK 10.11

\*LTM: Bol.com (Q4/19), Cdiscount.com (Q2/20), AMZN, CDON and WISH (Q4/20). Ozon take rate: FY/19. Amazon site visits: Europe Big-5 and Sweden Source: SEB CDON is a smaller company, with GMV of EUR 235m versus Allegro's EUR 6,850, but GMV in both companies are largely being generated from 3P merchants. This implies that commission income also contributes a higher share of group revenue at Allegro and CDON, respectively. Estimated take rates are also rather similar at levels of between 9% and 11% of 3P GMV, respectively.

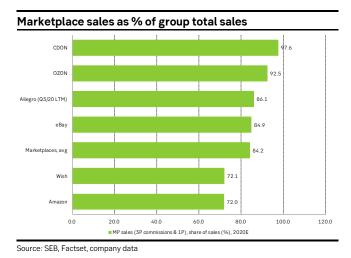

Allegro's EBITDA-to-GMV margins are higher than CDON's (current) margins. We believe a higher share of advertising on Allegro's platform provides some of the explanation. Allegro derives 8% of sales from advertising products (Q3/20 LTM), while we estimate CDON's advertising sales to be below 1% in 2020. Consensus forecasts for the peer group imply an average sales contribution of 6.4% in 2020E, serving as an indication of the long-term potential in CDON.

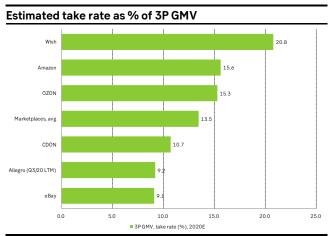

Source: SEB, Factset, company data

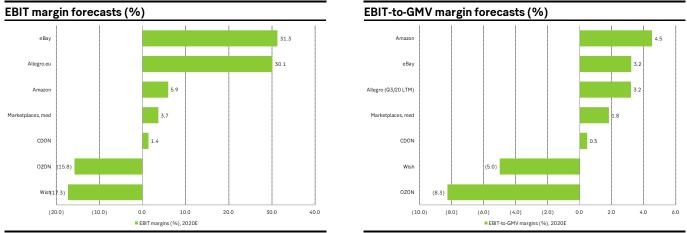

Source: SEB, Factset, company data

Source: SEB, Factset, company data

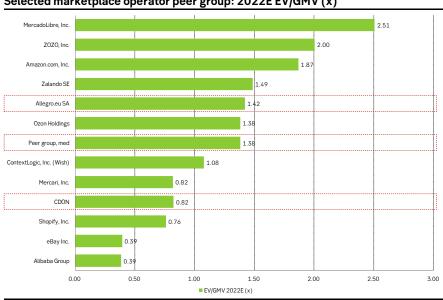

Source: SEB, Factset, company data

We believe the market will value CDON's equity based on EV-to-GMV. Looking at our GMV forecasts for next year, we argue CDON is now being valued at about  $0.80 \times 2022 EV/GMV$ .

This implies a rather significant discount of 43% to its peer group median currently trading at closer to 1.40x next year's EV/GMV estimates. Main peer Allegro too is being valued at (slightly above) 1.40x 2022 EV/GMV.

Selected marketplace operator peer group: 2022E EV/GMV (x)

Source: SEB, Factset

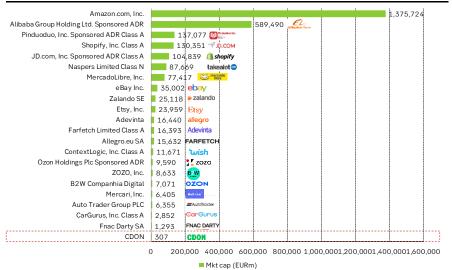

Based on current share price levels, we see 59% equity valuation potential to our midpoint DCF based equity value of SEK 850 per share. At our midpoint DCF valuation, this would imply a prospective EV/GMV of 1.40x our 2022 estimates and a valuation more in line with is sector peer group median.

Source: SEB, Sweden's National Institute of Economic Research

Over the past two- and a half decades, discretionary spending on durable goods has grown by an average of 4.4% p.a. This is equal to 1.8x the corresponding growth in disposable income, suggesting a solid growth outlook for retail sales in the Nordic market

From a cyclical perspective, we base our 2021-22 consumer spending forecasts on a rebound in Nordic consumption growth to a weighted average level of about 3.9% p.a. This reflects more normalizing unemployment concerns (a correlation well-established) and should be viewed in context of 2020 recording the weakest consumption growth on record, so far, amid the Covid-19 pandemic situation. More importantly, over the past two- and a half decades, discretionary spending on durable goods has grown by an average of 4.4% p.a. This is equal to 1.8x the corresponding growth in disposable income, suggesting a solid growth outlook for retail sales in the Nordic market.

# TAM forecasts – marketplace

### Secular drivers top cyclical spending

Sweden: total online retail of goods, travel and services, 2019E (SEKbn)

Source: Nets, Svensk Handel, SEB

While estimates for the online market could include different revenue streams, the chart above, using Sweden as an example, breaks down the market value by the three main segments Goods, Services and Travel, which today contributes almost half of total online spending. In our estimates of the total addressable market (TAM) for CDON's Marketplace, we exclude Travel, such as hotel bookings and online ticketing; and Services, such as music and video streaming and food deliveries, for example. Our analyses also exclude online business-to-business sales. Market forecasts for e-commerce-based retail sale of goods, points to growth rates well-above general consumption growth in the Nordic region and in international markets.

Nordic online retail sales of goods: mark	et value estimates (SE	Kbn)	
Online market forecasts (SEKbn)*	2019E	2024E	CAGR (%)
Sweden	77.3	151.3	14.4
Denmark	34.6	55.2	9.8
Finland	32.9	46.4	7.1
Norway	25.2	39.2	9.2
Nordic-4	170.0	292.1	11.4
CDON total GMV (SEKbn)	2.0	5.1	20.9
CDON market share, Nordic-4 (%)	1.2	1.8	0.6

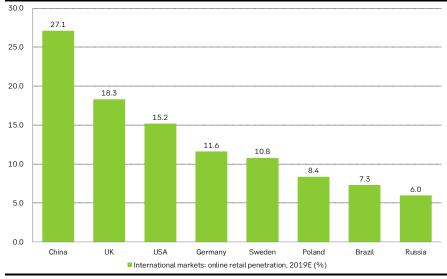

Source: SEB, CDON (Euromonitor), PostNord (E-commerce in Europe 2020). \*Based on spend in 15-79ys population

Based on consumer surveys, indicating an average annual spend per capita of EUR 856 in the Nordic four countries, the total online retail market for goods could be estimated at SEK 170bn, of which Sweden is the largest market (SEK 77bn) in the Nordic region. This survey is based on spending in the 15-79 years' age group which could partly explain some of the difference between other (higher) market estimates. According to CDON, Euromonitor forecasts imply a market CAGR of 11.4% in the period 2019-24, with growth expectations ranging from 7% (Finland) to 14% (Sweden). This implies that the total Nordic market value would grow to SEK 292bn in 2024.

Based on these market estimates and our financial forecasts for CDON (we expect its total GMV to increase from SEK 2bn in 2020, to above SEK 5bn in 2024), this implies that CDON would approach 2% share of the Nordic online market. According to Boston Consulting Group (BCG), Amazon's market share in Sweden is estimated at about 2%. This has been achieved without a dedicated country site and without local fulfillment, i.e. based on cross-border sales and shipping. Amazon launched in Sweden on 28 October last year. BCG expects Amazon to take a 5% market share over the same period, which we agree looks reasonable. At these levels and based on the market forecasts, Amazon would generate a GMV of closer to SEK 15bn (compare CDON at SEK 5bn in 2024E). We argue this points to the still fragmented local market suggesting room for growth and further market share gains for both Amazon and CDON ahead.

Amazon.se: what if scenario analyses				
	2019E	2024E	2024E	2024E
What if: Amazon market share scenarios (SEKbn)				
Amazon market share, Nordic-4 (%)	2.0	5.0	7.5	10.0
Amazon total GMV, implied	3.4	14.6	21.9	29.2
CDON total GMV	2.0	5.1	5.1	5.1

International online penetration rates in selected economies (%)

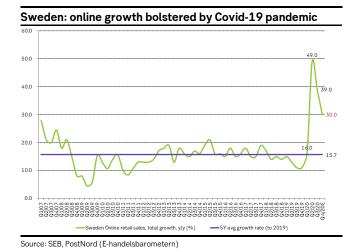

Source: SEB, PostNord, Allegro.eu (OC&C), Ozon Holding (INFOLine Russsia, Euromonitor)

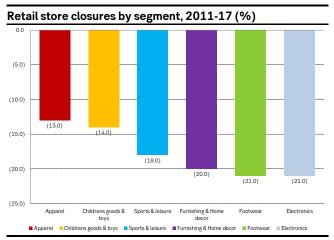

Most online growth assumptions, across sectors and country markets, build from low penetration levels and reflect the accelerating change in consumer behavior. Here, consumers increasingly choose online retail stores and marketplaces, such as Amazon and CDON, when shopping for goods and services.

Corroborating our arguments for increasing online penetration rates, physical retailers have adapted to the retail channel shift by closing about one-fifth of their store networks in segments like sports & leisure and electronics. In all, with online sales in Sweden crossing 10% of total spend already in 2018 (up from 2% in 2005), the big-box and city mall retail channel has come down from a 65% share of spending in 2005, to levels approaching 50%.

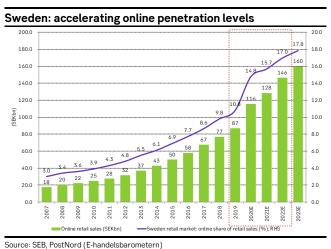

Source: SEB, Svensk Handel

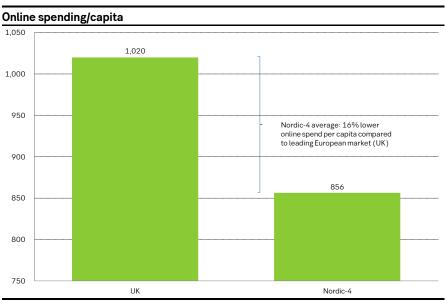

Source: SEB, Svensk Handel

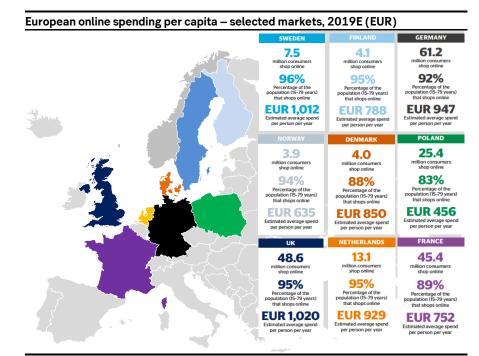

In the shorter term, the Covid-19 pandemic has clearly boosted online developments. In Sweden, growth increased from 16% y/y in Q1/20 (the average growth rate over the past 14 years) to 49% y/y in Q2/20. Also, less developed online segments, such as Groceries have recorded a marked uptick in sales growth over the past three quarters. Pick-up points outside grocery stores and home delivery services have been a key driver here and, we argue, should have added new consumers to the total online population going forward.

PostNord estimates the Swedish online market to grow by one-third in 2020 to levels of about SEK 116bn. Based on our forecasts for private consumption and total retail spend in Sweden, this would imply an online penetration rate of 14.8%. Admittedly, this rate increase is partly driven by the denominator, reflecting our estimates for a 2.8% y/y decline in total retail spending in 2020.

In the longer-term, based on spending per capita estimates and comparing the Nordic-4 markets (EUR 856) to the leading European online market (the UK), this suggests a 16% gap potential compared to the average annual spend of EUR 1,020 in this market.

CDON ended 2020 with about 2.25m active customers across its Nordic-4 sites. This was up 27% y/y from 1.8m customers in 2019. This implies a "market share" of over 8% of the Nordic population. Based on our estimates, we expect CDON to count almost 3.5m active customers at the end of our explicit forecast period in 2023, which would correspond to 12.7% of the Nordic population forecast. Outlining our estimates until 2025, we reckon this share will continue to increase to over 15% of the population. This implies 4.25m active customers at year-end 2025 and a five-year CAGR of 12.5% in 2021-25.

#### Population growth and CDON active customer forecasts

Source: SEB, US Census Bureau

Adding our take rate forecasts for CDON Marketplace and our retail sales assumptions for CDON Retail to our customer projections, we estimate total GMV to more than double, from SEK 2.4bn in last year, to SEK 5.1bn in 2024. Again, this would result in a market share of about 2% of the Nordic online retail market.

CDON Marketplace and Retail: gross merchandise value forecasts (SEKm)

# The market for marketplaces

### The mutual benefits of an oligopoly

Just like in search advertising (Google), local and yellow pages (Solocal) and classified advertising (Adevinta), the inherent strength in a marketplace business builds from a mutual benefit of "all" buyers being able to find "all" products and sellers and vice versa. This is corroborated by the top-three marketplace operators in the US and in Europe today taking closer to 45% share of the local e-commerce market respectively.

Source: SEB, Ozon Holdings (INFOLine, Euromonitor)

Also, in many of the surveyed markets outlined in the chart below, marketplaces are very commonly used. We note that the survey focuses on the usage of international marketplaces and therefore CDON is not included.

Source: SEB. PostNord (E-commerce in Europe 2020)

According to PostNord, between 16% (Sweden) and 24% (Denmark) of the Nordic online population states that they have shopped with Amazon. In the same survey, Zalando is today the most used international marketplace in the Nordic region, with more than one-third of population as customers.

The recent launch of Amazon in Sweden, already taking an estimated 2% share of the market from cross-border sales only, should help build the marketplace market in the Nordic countries, we argue. With local sales and local (same day) deliveries from its new distribution centre (DC), planned to open in February 2020, this should improve the customer experience with *amazon.se*. Here, Khuene Nagel, the logistics company, has confirmed that they will operate a 15,000 sq m DC for Amazon, located in Eskilstuna, Sweden.

Survey: having shopped on the following international marketplaces

### Browsing down virtual high street

CDON maintains a strong brand and position in the local retail market and ranks as one of Sweden's most favoured online sites. Consumers also rank CDON highly when asked where they have mostly shopped during the past year. This position is shared with a cluster of other prominent retailers including H&M and Zalando, as well as online book-store Adlibris and outlier Apotea, the online pharmacy.

Source: PostNord (e-handelsbarometern 2019), SEB (adapted)

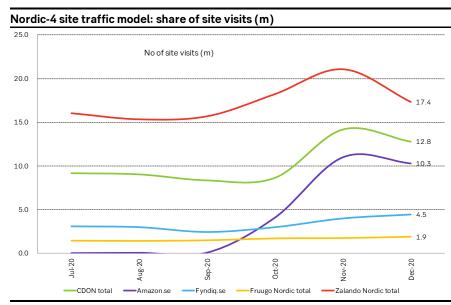

Other competing marketplaces in the Nordic region include Fyndiq (local) and Fruugo (UK). Fyndiq's consumer proposition is based on being the to-go-to site for bargains and could be described as an online outlet (compare membershipbased campadre.se). Fruugo's four Nordic sites are part of UK-based Fruugo Ltd. Fruugo operates a total of 42 dedicated country marketplace sites across Europe, Asia and the US and the business idea is to facilitate non-domestic consumer product sales in local markets. As such, its marketplace connects local consumers with retailers from around the world.

Importantly, all brand propositions outlined for the leading international or local marketplaces below indicate a focus on different segments of the retail market. The exception would be Amazon and CDON, which share the proposition of being the online department stores in the market.

Company	Brand	Market position	Brand proposition
Amazon (USA)	amazon.se	Department store	"Earth's most customer-centric company"
CDON (Swe)	cdon.se	Department store	"The Nordic region's largest marketplace"
Fyndig (Swe	fyndiq.se	Discount/outlet	"Sweden's largest marketplace for bargains"
Fruugo (UK)	fruugo.se	Cross-border store	"Thousands of retailers from all over the globe
ContextLogic (USA)	wish (app)	Discount/private labels	"Direct from merchants to consumers"
Zalando (Ger)	zalando.se	Fashion destination	"Europe's leading online fashion platform"

Source: SEB

36

Source: SEB, Similarweb

Online fashion company Zalando is estimated to take a share of between 7% and 10% of apparel and footwear sales in the Nordic four country markets. In December 2020 the group recorded 17.4m of combined site visits to its Nordic sites.

This makes Zalando the largest player in the Nordic region and 36% larger than the runner-up CDON, with a total of 12.8m visits. Zalando has previously announced its intention to wind down its private label sales. Instead the group's strategic focus is to build its marketplace by offering the reach and distribution benefits to other retailers and brand owners. The communicated average take rate levels in its Partner Program corresponds to 15% of processed GMV.

In December 2020, about two months after the launch of Amazon in Sweden, the company site amazon.se reached 10.3m visits. In all, this forms a cluster of three marketplaces that are clearly larger than others in the Nordic region (Zalando, CDON and Amazon) and where Fyndiq and Fruugo's reach combine to about half the levels recorded by CDON.

Benchmarking a selected number of marketplaces in the Nordic region from a consumer perspective (assortment, freight costs and deliveries) and from a merchant perspective (fees) we note some important differences.

#### Wish - from China to the world

Wish, the app-only marketplace, owned by US Contextlogic Inc., imports private and white labels from mainly China and retails these goods at steep discounts of "up to 85%". Wish is one of the top-three international marketplaces preferred by consumers in all four Nordic countries. While the company has about 500,000 merchants on its platform, distorting the benchmarking to other players above, Wish targets the specific market segment for bargains and discounted non-branded goods. We believe the low sales value of goods could also explain why take rates at Wish are well-above marketplace average levels.

Consumer survey: top-3 international marketplaces (having shopped?)									
(%)	Amazon	Ebay	Wish	Zalando					
Sweden	16		20	36					
Denmark	24		27	37					
Finland		22	17	32					
Norway		26	29	38					

Source: SEB, PostNord (E-handeln i Europa 2020)

#### Amazon.se - a truly strong consumer proposition

While the launch of Amazon.se was ridiculed in local media for machine made mistranslations of product descriptions, etc. (errors are still left on the site), Amazon's local consumer offering is strong, including a large selection of products and across many categories. In addition, amazon.de or amazon.co.uk are still a click away, for those products that ship to Sweden. Standard delivery freight cost is zero on deliveries from its own inventory (first party -1P). When consumers choose a product from a third-party (3P) store on the marketplace, free delivery thresholds are met at an average basket value of SEK 229. Similar to in other markets, our price comparison survey, while limited, suggests that Amazon is positioned as the price leader in Sweden.

Adding the imminent launch of local distribution (allowing for same day deliveries), we conclude that Nordic consumers should find shopping with Amazon increasingly attractive. As Amazon gains share of the Nordic e-commerce market, allowing for scaling of costs and leading to ever-lower prices, this also risk feeding through to pressure on margins for retailers and brand companies.

The number of merchants that have signed up with Amazon in Sweden so far is undisclosed by the company. Amazon's seller portal (Amazon Services Europe) lists the current merchant subscription fee at SEK 410 per month (excluding VAT). On top of this, we estimate that the Amazon group average merchant take rate in 2020 was about 15.5% of GMV.

### Cdon.com – a better merchant proposition

CDON, the leading marketplace in the Nordic region, reported a total of just over 1,500 merchants on its platform at year-end 2020. This corresponds to an increase of about 475 merchants compared to in 2019. Reflecting its new e-commerce platform for merchants on its marketplace being rolled out in Q4 last year, we expect CDON to continue to grow the number of merchants to closer to 2,700 in 2023 (2021-23 CAGR of 17%). In connection with the change in platform, CDON also introduced monthly subscription fees for its merchants, priced at SEK 299 per month (excluding VAT). In all, adding our estimated take rate of 10.7% of its 3P GMV in 2020, total merchant costs are clearly lower at CDON compared to Amazon.

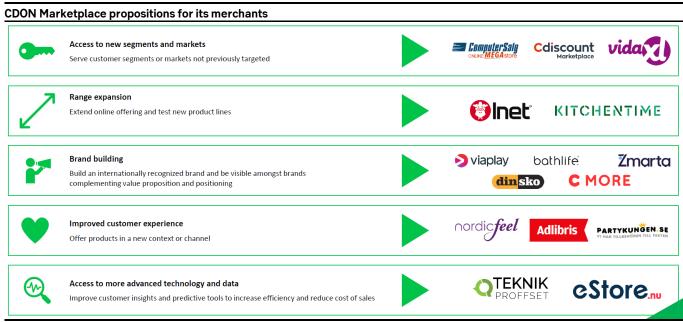

Consumers can get free shipping (on orders over SEK 100 in value) with a CDON+ membership. CDON+ costs SEK 299, or SEK 199 in connection with one order over SEK 599 in value. Elsewhere, for the vast majority of its product categories, freight costs are typically quoted in the range of SEK 29-49.

We believe that CDON offers Nordic merchants an attractive proposition: either as a choice over Amazon, or as a complement to Amazon. CDON is an established (unaided top-of-mind) consumer brand in its Nordic home markets. Also, merchant pricing is set at a discount. We also believe that the ongoing phase-out of CDON Retail will eventually make CDON a pure operator of a marketplace for merchants and without competing with its retail clients. The table below summarizes select key reasons why merchants choose CDON over Amazon, according to CDON.

#### **CDON versus Amazon.se**

CDON vs. Amazon - for merchants	CDON Amazon		Why CDON?				
Marketplace	Nordic-4	16 countries	Merchants that want to grow in the Nordic markets				
Brand	Local leader	Global leader	Established consumer brand in its Nordic home markets				
Integration	Easier	More cumbersome	Pitched as easy and fast integration				
Take rates (2020E)	10.7%	15.6%	Market price leader (on average "about 25% lower take rates")				
Support	Personal	Automated	Dedicated account managers				
Retail GMV (2020E)	25%	39%	Dedicated to the success of its merchant customers

Cervera	<b>Q</b> LITIUM	Klarna.		allegro
ellos	Magento An Adobe Company	PayPal	postnord	Cdiscount
	🗿 shopify	QLIRO	unifaun	CDON

Source: SEB

Last year, one of Europe's largest marketplace operator, Cdiscount (owned by Food retailer Casino) started trading on CDON Marketplace. Cdiscount's initial offering added about 50,000 SKUs for Nordic consumers within primarily the Electronics, Home, Baby and Children's Toys product categories. Cdiscount is now developing its own marketplace-as-a-service (MaaS) offering said to address a market of "about 900,000 European e-commerce web sites".

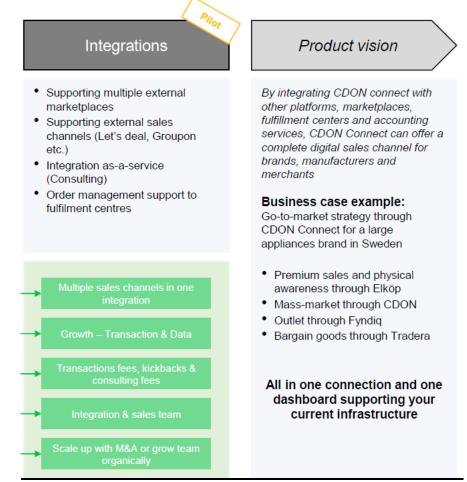

CDON's future growth strategy also builds from adding various new merchant services through its proprietary merchant platform, called CDON Connect. These services are in part composed of recurring revenue and could be compared to a software-as-a-service (SaaS), offered by companies like Shopify and Adobe's Magento. Here, merchant customers pay a subscription fee based on usage, while the software is cloud-based. CDON's ambition is that CDON Connect eventually could manage all aspects of selling online for a merchant.

Source: CDON

CDON Connect will integrate (add-on) with its new marketplace platform version was rolled-out in Q4 last year. While the company experienced some initial negative effects on customer experience and conversion rates in the period, CDON expects this to allow for new integrations and new revenue streams in the future, such as CDON Connect.

#### CDON Connect – current MaaS developments and product vision

Source: CDON

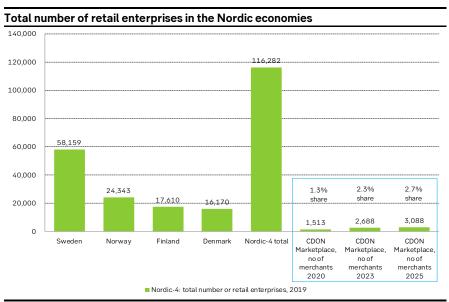

Specifically, we believe CDON Connect will allow the group to also offer Nordic retailers an easy and cost-efficient alternative to connect with marketplaces outside of the Nordic region. While still in its infancy, this will create new revenue streams from a take rate on the merchant GMV generated also on the external marketplace. We estimate these take rates to be lower, at about 2.5% of GMV, compared to levels of about 10-11% on GMV at its own marketplace.

The new CDON Connect technology will also enable more advertising solutions, such as various sponsored advertising products. This would allow merchants to buy visibility and ranking results on the marketplace in order to drive sales.

In all we have identified four main future revenue streams, based on continuing developments of its CDON Connect e-commerce platform in 2021:

- Monthly merchant subscription fees (launched in Q4/20)
- Take rate commission on external marketplace GMV
- Merchant services (fulfilment services, for example) and supplier kickbacks (kickbacks on payments through Qliro are in place)
- Advertising income

Estimating the total addressable market (TAM), there are over 115,000 registered retail companies in the Nordic countries (of which almost 60,000 are registered in Sweden). While most of these enterprises are very small (employing no more than five people), market research, covering small and medium-sized retailing companies, shows that the global average revenue per merchant (ARPM) is USD 1,653 per annum. According to Shopify, this suggests that the global market value for e-commerce platforms is estimated at USD 78bn.

Source: SEB, Statistics Sweden, Denmark, Finland and Norway

Global market for Retail SME e-commerce platforms							
Global TAM, SMEs, retail enterprises, 2019	USD	SEK					
Annual ARPM	1,653	13,852					
No of retail merchants (<500 FTEs) (m)	47.0	47.0					
Gobal TAM, Retail SME segment (bn)	78	651					

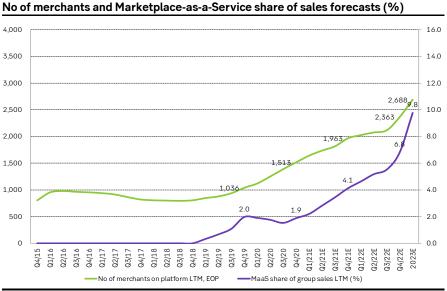

Source: Shopify, AIM Partners, SEB

Using these metrics as a very rough calculation for the Nordic market, we arrive at an estimated base case market value of SEK 0.8-1.6bn, depending on the assumptions for the actual number of addressable companies. Including also larger companies, we reckon these ARPM assumptions are too low. For CDON we estimate the number of connected merchants to grow from about 1,500 in last year to about 2,700 in 2023 (and over 3,000 in 2025), then corresponding to 2.7% of the total number of registered retail enterprises in the Nordic market.

(SEKbn)				Annua	al ARPM (SEK	.)		
		9,696	11,082	12,467	13,852	15,237	16,623	18,008

58,141	50.0	0.56	0.64	0.72	0.81	0.89	0.97	1.05

Source: SEB

Based on our forecast assumptions for MaaS income, we believe CDON Connect could generate sales of SEK 31m in this year, SEK 53m in 2022 and SEK 83m in 2023. This would correspond to almost 10% of our group revenue forecast in this year. Importantly, as highlighted below using Shopify as a case example, these revenue also come with high gross margins.

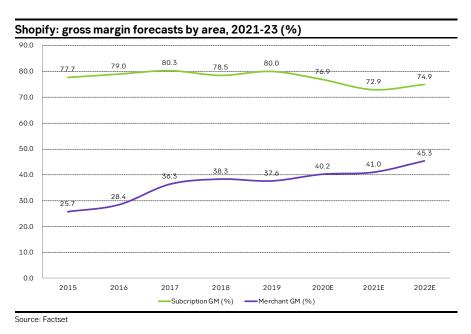

Source: SEB

### Shopify – the e-com subscription model

Shopify's e-commerce platform is used by companies to run their retail business across sales channels, including web and mobile storefronts, physical retail locations, social media storefronts and marketplaces. Shopify's platform enables merchants to manage products and inventory, process orders and payments, fulfil and ship orders, build customer relationships, source products, leverage analytics and reporting and access financing – all from one integrated back office.

Shopify reports two revenue streams: subscription-based sales and merchant solutions sales. Merchant solutions include mainly payment processing fees, but also take rate commissions and shipping and fulfilment fees linked to the GMV processed through its platform. Subscription income is being generated from monthly subscription agreements with merchants, covering variable platform fees, sales of themes and apps, as well as income from domain name registrations.

Reflecting a higher share of sales from apps and platform fees, Shopify's subscription solutions revenues have grown faster than its annual recurring revenue (ARR) over the past years. Still ARR probably better reflects the long-term value of its relationship with its merchant customers. Also, we note the high gross margins generated in its subscriptions solutions area in the past years. Based on consensus forecasts, gross profits are estimated at between 73% and 77% of sales in 2021-23.

# **Company description**

### **Connecting consumers and merchants**

CDON is a Swedish company established in 1999 as a pioneer online retailer of mainly media products, such as CD records, in the Nordic market. In 2013, the group opened the platform to external retailers. CDON was previously a division in Qliro Group which decided upon Lex Asea dividends and separate listings of both former divisions CDON and Qliro, the consumer bank, to its shareholders. CDON started trading on Nasdaq First North Growth market on 6 November 2020.

CDON's marketplace today offers consumers several different categories ranging from home electronics to sports and leisure items, clothing, shoes and toys. There are over 1,500 external merchants on CDON marketplace that sell and market their products reaching over two million Nordic active customers on the platform. CDON's business idea is to offer its registered merchants a commission-based sales platform. In the future, CDON may receive additional fees in the form of membership fees, advertisements, additional services and more. The marketplace model gives CDON the opportunity to expand its operations without the associated investments in working capital (inventory, distribution centrals) while at the same time offering consumers a wide assortment in a range of product categories – and at competitive prices. CDON is headquartered in Sweden but also operates local marketplaces in Norway, Denmark and Finland.

### **Business model and logistics**

CDON allows traders to conduct their sales on its marketplace in exchange for a commission (called take rate, or referral rate). CDON retail has its warehouse in Ljungby, Sweden, which is owned and operated by PostNord. Since the remaining business category in CDON Retail is the sale of CDs and DVDs and similar media products that are in structural decline, CDON Retail will be operating as a retailer on CDON Marketplace for as long as the NPV of cash flow is positive. At CDON Marketplace, each merchant handles their own logistics and deliveries to end-consumers. CDON forwards information about all purchases on its marketplace to the merchant, that assumes the responsibility of delivery.

A limited portion of products are sold through drop shipment partners. These products are handled by 10 different warehouses mainly in Southern Sweden. These warehouses are owned by the retailer and the retailers handle products within mobile, data, components, and more. The products are stocked at each retailer, but everything else is handled by CDON. The products are sold on the CDON marketplace and when an order is placed, all handling is transferred to CDON. To create the best possible value add for consumers, CDON offers different shipping options, such as "fast delivery" and home delivery.

### Strategy and focus in 2021

CDON's goal and strategy for 2021 is to continue to strengthen its position as the Nordic region's leading local marketplace for merchants. By increasing the number of merchants and the range of goods and services this will improve the consumer experience on the platform. CDON will continue with its Retail sales but only within the media product category (where CDON is the leading retailer in Sweden). CDON will also continue to invest in technology and its new platform CDON Connect. These investments aim at improving the e-commerce experience for consumers and merchants on CDON Marketplace, but also to enable the company to launch new merchant services and add new revenue streams ahead.

More and more people use mobile devices when buying goods and services online. Euromonitor estimates that sales through mobile devices will account for 44% of e-commerce in Sweden in 2024. New technology investments are an important part of the development of e-commerce. The technology makes it possible to automate processes and process more complex information. "Big Data" helps merchants to create customized offers and improve the user experience ranging from purchase to payment and deliveries.

Payments and check-out solutions are an important part of the e-commerce offering. Here, CDON has a partnership agreement with Qliro until January 2024. Qliro ensures that consumers have several different options to choose between, including card payments and direct bank transfers

### **Disputes and legal matters**

In 2015, the Finnish Tax Authority claimed that CDON Alandia, a subsidiary of CDON, should pay a total of EUR 6.9m in additional taxes and fees covering undeclared VAT sales in Finland for the year 2012. CDON settled the tax payment in full in January 2017 and has disputed the claim until a final appeal to the Finnish Administrative Court was dismissed in October 2019. Five previous board members in CDON Alandia were charged with tax fraud. The Finnish Tax Authority has also raised claims against four of these individuals. In the event that these claims become valid, CDON has agreed to assume responsibility for the vast majority of these costs.

He joined CDON as head of business control in September 2017. Niclas has experience in financial management from Kährs Group, Akzo Nobel and Axis Communications. Mr Szieger holds a Master's degree in Economics from Lund University and a bachelor's degree from Georgia College & State University.

**David Olhed** owns 128 shares in CDON and has been the Commercial manager (CCO) since June 2014. David started at CDON in 2008 and has held a number of different senior positions within the Company, including as chief financial officer (CFO) and controller. Mr Olhed holds a Master's degree in Economics and trained business lawyer from Lund University.

**Peter Rosenfors** has been Technical Manager (CTO) since May 2020. Peter has extensive experience from leading positions in development. He most recently came from Axis Communications, where he was engineering manager and has previously worked at Palette Software and FordonData. Mr Rosenfors holds a Master of Science in Geographic IT.

**Kajsa Helmbäck** has been HR manager (CHRO) at CDON since January 2020. Kajsa has extensive experience in recruitment, personnel issues and cultural development. Kajsa most recently came from FordonsData, where she was HR manager and has previously worked at, for example, Svevia, Manpower and Bravida. Ms Helmbäck studied staff and working life orientation at Lund University.

**Rasmus Jung Demse** has been Product Manager (CPO) at CDON since September 2020. Rasmus has extensive experience in product development and project Management, most recently as PMO manager at Resurs Bank. Prior to that, Rasmus was IT Manager at Phonera/ ComHem B2B. Mr Jung Demse holds a Bachelor's degree in economics from Lund University.

### **Board of directors**

**Markus Lindqvist** owns 3,666 shares in CDON and has held the chairman of the board position since August 2016. Markus was president and CEO of Qliro group from August 2016 to June 2020. Prior to that, he came from the role of head of B2B Sweden & products within Dustin Group. Markus has previously been Sweden's head of Hewlett Packard's PC division and was responsible for DELL's channel operations in the Nordic region. Markus is also a board member of Catena Media Plc. Mr Lindqvist holds a University degree in business administration from FEI in Stockholm.

**Christoffer Häggblom** has been a board member of CDON since June 2018. Christoffer owns 1 574,782 shares via Rite Ventures. He is the Founder and Managing Partner for Rite Ventures and Christoffer has 20 years of experience in technology-focused growth companies, both as an entrepreneur and investor. Christoffer is the chairman of the board of Verkkokauppa.com which is Finland's largest e-commerce company listed on Nasdaq Helsinki, and is also a board member of the SaaS company Lemonsoft and Acervo which is an investment company focused on listed stocks and bonds. Christoffer is also Chairman of the board of Qliro Group. Mr Haggblom holds a Master's degree in Financial Economics from the Hanken School of Economics in Helsinki.

**Josephine Salenstedt** has been a board member of CDON since September 2020. She is a partner in Rite Ventures and she has assignments as chairman of the board of Söder Sportfiske AB and is a board member of Qliro Group, paradox, Interactive AB and Doro AB, among others. Previously, Josephine has, among other things, been chairman of the board of Skincity. Ms Salenstedt holds a Master of Business Administration from the Stockholm School of Economics.

**Niklas Andersson** has been a board member of CDON since April 2020. Niklas has previously been CTO at Doktor24, Fishbrain and Keycrunch, among others. He is today Head of Data at Mathem and adviser to Kinnevik on technology issues. Mr Andersson studied at Chalmers University of Technology in technical physics and computer science.

**Kristina Lukes** owns 436 shares in CDON and she has been a board member of CDON since September 2020. Kristina is the CEO of Nelly since April 2020. She has previously worked with business development, sales and marketing and product development of fast-moving consumer goods. Kristine has also been the CEO of one of McCann's communications and advertising agencies located in Gothenburg. Her latest establishment was at Paulig, where she was responsible for Santa Maria's and Risenta's brand and range. Ms Lukes holds a Master of Business administration from the School of Business, Economics and Law at the University of Gothenburg.

# Peer snapshots

### Adevinta

Adevinta is a major global pure play online classifieds company with generalist, real estate, cars, jobs and other marketplaces in 16 markets across the world. Its portfolio spans more than 30 different products and online classifieds sites and attracts an average of more than 1.5bn monthly visits (source: Schibsted) across markets with a combined population of 800m people. Pending regulatory approval, Adevinta is in agreement to acquire eBay Classified Group (eCG), which we estimate will more than double our estimated sales in this year to EUR 1.45bn and to EUR 2.85bn in 2022 (full consolidation).

## Alibaba Group Holding

Alibaba Group is the world's largest marketplace as measured by GMV. Its businesses are comprised of e-commerce, cloud computing, digital media and entertainment, and various innovation initiatives. Ant Group (unconsolidated, but related party), provides payment services and offers financial services for consumers and merchants on its platforms. In Q3 2020, the group reported 779m active customers across its marketplaces, including T-Mall and Tabao in China.

### Allegro.eu

Allegro is a Polish company founded in 1999. Online auction website QXL Ricardo PLC acquired Allegro in March 2000, which was subsequently acquired by Naspers in 2008. In 2016, Naspers Allegro sold the company to a group of investor funds and Allegro was listed on the Warsaw Stock Exchange in connection with its IPO on 29 September last year. Allegro.eu conducts e-commerce and is the largest marketplace in Poland and one of the largest e-commerce websites in Europe. In its marketplace, there are over 125,000 stores offering over 200m services in a wide range of categories. It has over 20m visitors every month with the equivalent of 80% of all internet users in Poland. Factset consensus expects Allegro to record EUR 7.6bn in GMV in 2020.

## Amazon, Inc.

Amazon is today a world-leading e-commerce and cloud service company. The company offers a wide range of services including online sales of consumer goods and cloud-based solutions via Amazon Web Services for its corporate customers. Its business is conducted on a global level and it has customers in several sectors. In full-year 2020 Amazon reported a GMV of about EUR 417bn, making it the second largest marketplace operator in the world. In 2019 Amazon is estimated to take a 37% share of total online retail spend in the US market.

### **B2W** Digital

B2W Digital is a Brazilian company that primarily conducts e-commerce business. B2W handles digital platforms that sell various goods via the internet, TV, catalogues and distribution channels. Brands on the platform include Americanas.com, Submarino, Shoptime and Soubarato. B2W also offers payment, credit and financial services through brands such as Digital Finance, Submarino Finance and AME. The company is controlled by Lojas Americanas. Consensus expects B2W Digital to record GMV of EUR 4.3bn in 2020.

# Contextlogic, Inc. (Wish)

Contectlogic is the parent and operator of mobile app marketplace Wish and other sites. The company was founded in 2010 and is headquartered in San Francisco, USA. Its platform has grown rapidly in recent years to connect more than 100m active users each month, spread across over 100 countries with about 500,000 merchants around the world (mostly from China). Wish is today the most downloaded global shopping app and has been so for each of the last three years. Wish is expected to generate EUR 7.1bn in GMV in 2020, according to consensus estimates.

### eBay

Ebay inc is a global online trading company that gives its consumers the opportunity to sell and buy products through their online auction site. Either through eBay's app or its website. Here, both small and large companies and individuals can advertise new and used products. Everything from consumer electronics to clothes and books are sold and bought. Ebay is a leading trading company operating local marketplaces in 190 countries around the world. Ebay is in the process (pending regulatory approval) to divest its classifieds business (eCB) to Norway's Adevinta. In 2020, the group reported EUR 82.7bn in total GMV.

# Etsy, Inc.

Etsy is a marketplace providing e-commerce services for sellers, buyers and collectors. Their marketplace gathers millions of buyers and sellers from all over the world. The site has over 1 million unique stores and about 30 million members. What is advertised at Etsy's marketplace must be over 20 years old, handmade or craft material. The company was founded in 2005 and is expected by consensus to record sales of EUR 1.3bn in 2020.

# **Farfetch Limited**

Farfetch is an English company that operates a technology platform and marketplace for the global luxury fashion industry. Farfetch connects brands, retailers and consumers on its multilingual platform. As of June 2020 the company's marketplace catered 2.5m active customers with goods from 1,200 merchant sellers. Consensus expects full-year 2020 GMV to reach EUR 2.6bn.

### JD.com, inc.

JD.com is China's largest online retailer. JD.com offers a wide range of products through its websites and mobile applications, selling all kinds of products to both private individuals and corporate customers. JD.com was founded in 1998 and is headquartered in Beijing, China. For 2020 consensus expects JD.com to generate a GMV of EUR 238bn.

## MercadoLibre, Inc

MercadoLibre is the largest e-commerce company in Latin- and South America. Mercado is present in 18 countries, including in Brazil, Argentina and Mexico. It claims about 125m active users and benefits from one of the fastest growing internet penetration rates in the world. In addition to its marketplace business, MercadoLibre also operates a large FinTech business (37% or revenue in Q3 2020), offering payment solutions. Consensus estimates is for the group to generate GMV of EUR 17.2bn in 2020.

# Mercari

Mercari is a Japanese e-commerce company founded in 2013. The company operates the mobile app mercari – a consumer-to-consumer marketplace for second-hand goods. Also the company provides "easy and inexpensive" shipping options from its partnerships with delivery companies and convenience stores across the country. Consensus estimates Mercari to record a GMV of EUR 6.2bn in this year.

# **Ozon Holdings Plc**

Ozon is one of the largest online marketplaces in Russia. It offers consumers a wide selection of over 9m SKUs across 24 product categories. Also it is Russia's largest parcel locker network with 7,500 locker across the country. Ozon Holdings listed ADRs in connection with its IPO on 24 November last year. Consensus expects Ozon to record GMV of EUR 2.1bn in 2020 growing to EUR 3.8bn in this year.

# Shopify

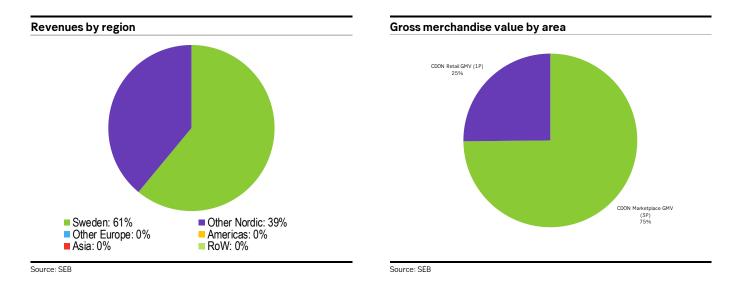

Shopify is a Canadian company operating a cloud-based e-commerce platform mostly used by small- and medium-sized retail companies. The company derives revenue from subscription and merchant solutions, where their software platform helps merchants with all aspects of running an online retail store and across all retail channels (online, offline to omni-retail). The GMV generated by retailers through its e-commerce platform is expected by consensus at EUR 97bn in 2020. In 2019 Shopify took a market share of almost 6% of the US online retail market, second only to Amazon with an estimated 37% share of the market.

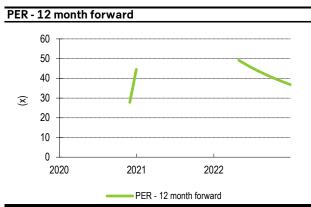

# ZOZO

ZOZO operates online fashion shopping sites. The Company sells apparel, garment accessories, bags, tableware, magazines, and other products. ZOZO also provides communication services relating to apparel such as blogs by fashion moguls and internet chat rooms for users. ZOZO was created in May 1998 in Tokyo, Japan. Based on consensus forecasts, ZOZO is expected to record GMV of EUR 3.3bn in 2020.

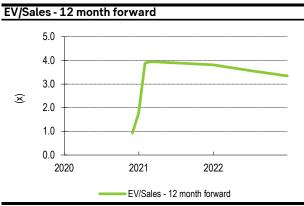

# **Overview**

Investment case	We argue CDON's strong market and brand position across the Nordic region support our high growth assumption in 3P GMV to almost SEK 4bn in 2023. Based on our take rate assumptions and gross margins closer to 93%, we reckon EBIT margin expansion will be significant too. Looking at its marketplace peers, the long-term margin potential could be closer to 25%. Growing marketplace commission income does not require the corresponding working capital investments as in a retailer, which also generates high ROCE.
Company profile	CDON operates the largest online marketplace in the Nordics. With over two million active customers in Sweden, Denmark, Finland and Norway CDON is also one of the best-known e-commerce brands in the region. In addition to CDON Retail (1P), offering media products, CDON's marketplace offers consumers products from over 1,500 external merchants (3P). Product categories range from consumer electronics to sports and leisure articles, clothing, shoes and toys. In 2020 external merchants and drop shipping partners (fulfilment directly from a supplier's warehouse) accounted for over 75% of CDON's total gross merchandise value (GMV). Based on the 3P GMV, CDON earns a take rate commission. This model offers CDON an opportunity to grow without the corresponding inventory capital resulting in an asset-light balance sheet. The ongoing rollout of CDON Connect, a platform for integrating merchants with external marketplaces, will increasingly add subscription-based income (SaaS) to its commission sales.
Valuation approach	We argue the market will value CDON based on EV/GMV. Here its peer group median and its main peer Allegro.eu trades at 1.40x 2022 estimated EV/GMV, which compares to CDON at 0.80x, we estimate. We arrive at a midpoint DCF equity value of SEK 850, using a WACC of 6.5% and a steady-state EBIT margin assumption of 24%. At his level the company would be valued in line with its peer group at 1.40x 2022E EV/GMV.
Target price risks	Amazon.se, being a new price leader in the Nordic market, could impact in form of price pressure feeding through to lower merchant margins as well. This may imply pressure on marketplace take rates. For this reason we base our current forecasts on declining take rates for CDON over the coming years. While the shift from retail to online is an important driver of marketplace GMV growth for many years ahead, the underlying market is based on growth in household disposable income and discretionary spending.

### About this publication

This report is a marketing communication commissioned by CDON and prepared by Skandinaviska Enskilda Banken AB (publ). It does not constitute investment research; as such, it has not been prepared in accordance with the legal requirements to promote the independence of investment research, nor is it subject to any prohibition on dealing ahead of the dissemination of investment research.

### This statement affects your rights

This report is confidential and may not be reproduced, redistributed or republished by any recipient for any purpose or to any person. Redistributing this report to third parties may invoke legal requirements on the person engaging in such activities.

### **Producers and Recipients**

SEB Research is approved and issued by Skandinaviska Enskilda Banken AB (publ) ("SEB"), a bank organized under the laws of the Kingdom of Sweden, on behalf of itself and its affiliates for institutional investors. When SEB Research is issued by an SEB subsidiary, the subsidiary itself is subject to this disclaimer.

### Use

This material has been prepared by SEB for information purposes only. It does not constitute investment advice and is being provided to you without regard to your investment objectives or circumstances. The document does not constitute an invitation or solicitation of an offer to subscribe for or purchase any securities and neither this document nor anything contained herein shall form the basis for any contract or commitment whatsoever. Opinions contained in the report represent the authors' present opinion only and may be subject to change. In the event that the authors' opinion should change, we shall endeavour (but do not undertake) to disseminate any such change, within the constraints of any regulations, applicable laws, internal procedures within SEB, or other circumstances.

### Good faith and limitations

All information, including statements of fact, contained in this research report have been obtained and compiled in good faith from sources believed to be reliable. However, no representation or warranty, express or implied, is made by SEB with respect to the completeness or accuracy of its contents, and it is not to be relied upon as authoritative and should not be taken in substitution for the exercise of reasoned, independent judgement by you. Recipients are urged to base their investment decisions upon such investigations as they deem necessary. To the extent permitted by applicable law, no liability whatsoever is accepted by SEB for any direct or consequential loss arising from the use of this document or its contents.

#### Distribution

This research report has been prepared by SEB or its affiliates and is being distributed by SEB offices in Stockholm, Copenhagen, Oslo, Helsinki, Frankfurt, London, Tallinn, Vilnius and Riga. Research reports are prepared and distributed in Lithuania by AB SEB bankas and in Estonia by AS SEB Pank in accordance with the requirements of the local laws and Financial Supervision Authority's conduct of business rules. This document may not be distributed in the United States, Canada, Japan or Australia or in any other jurisdiction where to do so would be unlawful. Addresses and Phone numbers for each office can be found at the end of the report.

### The SEB Group: members, memberships and regulators

SEB is a member of, inter alia, Nasdaq OMX Nordic, Oslo Stock Exchange, the London Stock Exchange, NYSE Euronext, SIX Swiss Exchange, Frankfurt Stock Exchange, Tallinn Stock Exchange as well as certain European MTF's such as BATS-Chi-X, Turquoise and Burgundy. SEB is regulated by Finansinspektionen in Sweden and, for the conduct of investment services business, in (i) Denmark by Finanstilsynet, (ii) Norway by Finanstilsynet, (iii) Finland by Finanssivalvonta, (iv) Germany by Bundesanstalt für Finanzdienstleistungsaufsicht, (v) the UK by the Financial Conduct Authority and Prudential Regulation Authority (details about the extent of our regulation by the Financial Conduct Authority and Prudential Regulation Authority are available from us on request), (vi) Estonia by the Estonian Financial Supervision Authority, (vii) Lithuania by the Bank of Lithuania, (viii) Latvia by the Financial and Capital Markets Commission and Futures Commission.

SEB's research reports are prepared in accordance with the industry standards and codes of conduct applicable to financial analysts in the countries where they are based. In Denmark, Finland, Norway and Sweden, analysts act in accordance with the rules of ethics of each country's Society of Financial Analysts. Analysts comply with the recommendations and industry standards of the Danish, Norwegian and the Swedish Securities Dealers Associations and with those of the Federation of Finnish Financial Services. Analysts certified by the CFA Institute also comply with the Code of Ethics of the CFA Institute.

### Prevention and avoidance of conflicts of interest

The remuneration of staff within the Research department is determined exclusively by research management and senior management and may include discretionary awards based on the firm's total earnings, including investment banking and markets (sales and trading businesses) income; however, no such staff receive remuneration based upon specific investment banking or markets transactions. SEB's Compliance department monitors the production of research and the observance of the group's procedures designed to prevent any potential conflicts of interest from affecting the content of research; the latter are described in greater detail in the "Statement of Policies for dealing with potential conflicts of interest surrounding our Research activities" which is available on our SEB Research website.

### Your attention is also drawn to the fact that:

The current market price of the securities shown in this report is the price prevailing at the close of the business day preceding the date of publication, save where such price was more than 5% different from the price prevailing as at the time of publication, in which case it is the latter.

Unless explicitly stated otherwise in this report, SEB expects (but does not undertake) to issue updates to this report following the publication of new figures or forecasts by the company covered, or upon the occurrence of other events which could potentially have a material effect on it.

The securities discussed in this research report may not be eligible for sale in all countries, and such securities may not be suitable for all types of investors. Offers and sales of securities discussed in this research report, and the distribution of this report, may be made only in countries where such securities are exempt from registration or qualification or have been so registered or qualified for offer and sale, and in accordance with applicable broker-dealer and agent/salesman registration or licensing requirements. A copy of this report, not including the recommendation, has been provided to the issuer prior to its dissemination to check factual statements for accuracy; as a result, some amendments have been made.

A full list of disclosures for other companies mentioned herein (in which SEB has research coverage), can be found on our SEB Research website

### Methodology

Final consideration as to any valuations, projections and forecasts contained in this report are based on a number of assumptions and estimates and are subject to contingencies and uncertainties, and their inclusion in this report should not be regarded as a representation or warranty by or on behalf of the Group or any person or entity within the Group that they or their underlying assumptions and estimates will be met or realized. Different assumptions could result in materially different results. Past performance is not a reliable indicator of future performance. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related investment mentioned in this report. In addition, investors in securities, such as ADRs, whose values are influenced by the currency of the underlying security, effectively assume currency risk.

### Company specific disclosures and potential conflicts of interest

A member of, or an entity associated with, SEB or its affiliates, officers, directors, employees or shareholders of such members (a) is not, and has never been, represented on the board of directors or similar supervisory entity of CDON, (b) has from time to time bought or sold the securities issued by the company or options relating to the company, and (c) SEB does not hold any short / long position exceeding 0.5% of the total issued share capital of CDON as of 31 Jan 2021.

The analyst(s) responsible for this research report (jointly with their closely related persons) hold(s) 0 shares in CDON and do(es) not have holdings in other instruments related to the company.
